# FWA360Leads®

Unlock The Next Generation of Leads

"Fraud, waste, and abuse schemes cause financial losses that represent about 3% of total healthcare expenditures. Given U.S. health spending hit roughly $4.8 trillion in 2023, **payers can expect to lose at least $144 billion annually.**"[1]

OVERVIEW

FWA360Leads™ delivers a smarter, more focused approach to identifying fraud, waste, abuse, and error (FWAE). Instead of overwhelming investigators with volume, FWA360Leads™ provides high-impact, intelligently ranked leads that surface the claims, providers, pharmacies, prescribers, and members that warrant deeper review.

It works across modules including PreShield®, PostShield®, RxShield®, and AIShield™, transforming siloed detection points into cohesive, actionable intelligence.

INTELLIGENT PRIORITIZATION. FOCUSED INVESTIGATION.

FWA360Leads™ combines artificial intelligence with rules-based logic, customizable lead types, and optional machine learning scoring to identify and prioritize high-risk patterns. Each lead includes context such as associated claims, entities, anomalies, applicable policies, and natural language summaries that provide a concise, investigator-ready snapshot. This empowers users to triage quickly and build cases efficiently with clear, actionable insights.

Focus your resources on what matters most. FWA360Leads™ ranks and delivers the highest-value leads across your entire detection ecosystem.

KEY BENEFITS

- **Centralizes leads** across detection modules into one actionable queue
- **Prioritizes cases** using customizable scoring and business rules
- I**ncludes natural language summaries** to streamline lead review
- **Integrates seamlessly** with PostShield®, PreShield®, RxShield®, and AIShield™
- **Includes contextual data** to support investigations and reduce research time
- **Enables direct case creation** via CaseShield™
- **Supports both** retrospective and real-time review workflows

CLIENT VALUE EXAMPLES

Challenge: Teams waste hours reviewing low-value leads

Solution: FWA360Leads™ scores and filters lead queues to highlight the highest-impact entities

Challenge: Investigators miss patterns across data silos

Solution: FWA360Leads™ connects detection logic from multiple modules to surface cross-cutting risk

Challenge: Manual triage delays case development

Solution: FWA360Leads™ delivers investigation-ready context with each lead and integrates directly with CaseShield™
