

QueryShield

AN ADVANCED AD-HOC QUERYING TOOL
WORKING IN CONJUNCTION WITH
PRESHIELD, POSTSHIELD & CASESHIELD

QueryShield

Healthcare Fraud Shield has developed a powerful ad-hoc querying tool that works seamlessly throughout FWAShield™. QueryShield™ enables a user to run real-time queries and complex pattern reports from data loaded into PreShield™, PostShield™ and/or CaseShield™. Some of the capabilities and advantages of QueryShield™ include:

- Customized reports to meet the reporting needs of state and federal regulatory agencies and industry associations
- Template reports that may be reused and are accessible by a single user or multiple users
- Aggregated summary reports
- Trending analysis reports
- Cross-claim querying capability
- Fraud alert impact analysis
- Instantaneous results that may be uploaded to CaseShield™ and/or exported
- Stored Point-in-Time results
- User-friendly interface
