

# Statistically Valid Random Samples (SVRS), & Medical Record Retrieval

One of the many challenges facing SIU & PI Departments is obtaining and reviewing medical records. The latest innovation from HCFS is AuditPlus. AuditPlus allows users to manage audits using built-in SVRS, quickly & easily request and receive medical records, and/or leverage HCFS SMEs to conduct the reviews & audit findings.

## Statistically Valid Random Samples (SVRS)

- SVRS tool within the HCFSPPlatform.
- Mirrors RATSTATS, with options for sample sizes, sample types and more.
- Provides supporting documentation and SEED number.
- Detailed line-by-line reviews, as well as summary reports detailing the findings.

## Medical Record Retrieval

- Claim Audit Selection is available from alerts, providers, codes, claim search and more.
- HIPAA Compliant, HITRUST Certified.
- Numerous methods to receive records.
- Fast Turn Around Times (TAT).
- Option to use HCFS SMEs to conduct reviews.
